Special Gladiolus Bulb Sale

We cannot all afford to pay \$5.00, \$10.00, \$25.00 or even \$1.00 for a new and promising variety of Glads, but one might spare 10c or perhaps \$1.00 for a bulblet, that with proper care might give you a small bloom the first year and a nice bulb for next season. By peeling the bulblet and planting it in a small pot or dirt band in March or April and get it well started by the time the garden is ready to plant, then turn out of pot or remove the dirt band without disturbing the roots and planting in the ground, they give splendid results.

Newer Varieties of Gladiolus

SIZES

It seems that the majority of people who buy bulbs do not understand the sizes. Commercially they are listed from No. 1 down to No. 6, and recently some growers on new high priced varieties are listing a No. 7, which usually is no better than a large bulblet, if peeled, and sometimes not so good. We are listing our bulbs this year in three sizes, as follows:

Large—These are 1 inch and average about $1\frac{1}{4}$ inches. Many much larger, according to variety. These should all produce from 1 to 3 spikes of bloom, and for each spike you get a bulb.

Medium are $\frac{3}{4}$ to 1 in. and should all give good blooms, but a week or two later.

Small will average over $\frac{1}{2}$ in. in size and if planted early and given good care many of them will bloom this year, but will be still later than the medium and not so large a bloom, and will give you nice medium and large bulbs for planting next year.

The sizes are abbreviated L. for Large, M. for Medium, S. for Small.

Corunna—A strikingly unusual flower. The soft garnet red blossoms are large with widely spreading, pointed petals. Large almost coal black blotches bordered with white, combine to make this an extraordinary flower. Sort of reminds one of a Navajo blanket. Large 25c each, \$2.50 per dozen; medium 15c each, \$1.50 per dozen; small 8c each, 80c per dozen; bulblets 10 for 15c, 100 for \$1.00.

NEW GLADIOLUS "SPIRIT OF ST. LOUIS"

An unusual, distinctly new color combination difficult to describe, but a color which, when all have seen, have instantly fallen in love with. According to Ridgeway's, the color is carrot red on salmon buff. It is one of the odd colors in the peculiar class with Rose Ash and I think it will be in the same great demand. The flowers are perfectly placed on the spike, having eight to ten flowers open at once and between four to five inches in diameter. The spikes are from four to five feet tall. I think it is one of the best Gladiolus novelties which has come out in the last few years and will be in great demand when people have seen it. The price is lower than any other new variety out. It's a winner.

Large \$1.00; medium 75c; bulblets 10c each.

Gertrude Errey—Long graceful spikes of shell pink flowers that shade almost white at center, spot of deeper color in throat. Many open, tip bud blooming as well in water as the first. A

lovely thing. Large 50c each, \$5.00 per dozen; medium 25c, \$2.50 per dozen; small 15c, \$1.50 per dozen; bulblets 5c each, 50c dozen.

To Our Southern and West Coast Customers:

We have had difficulty in filling some of your orders in time for spring planting on account of difference in seasons.

When it is warm and balmy and time for you to plant, we are still bound up in snow and ice and it is unsafe to make shipment from here, for fear of freezing in transit.

We have reorganized our shipping department so we can send your order in the fall and can guarantee safe shipment up to December 1st.

You will then be in shape to take advantage of the first nice weather in the spring to get your garden going.

Cordially,

F. M. PALMITER & SON.

Just bury the roots in sand; nothing more is required. Should be planted out very early in spring, and will commence growth and bloom at once, growing larger and finer every day. It is fine for cutting and the beautiful long spikes will keep for some time in water. It always creates a sensation wherever shown. Strong plants. 50c each.
